DETAILED ACTION

1. The changes to the abstract and specification filed 10/24/2005 are accepted.

Allowable Subject Matter

2. Claims 1-22 are allowed.
3. The following is an Examiner's Statement of Reasons for Allowance:

In interpreting the claims, in light of the specification and applicant's amendments filed October 24th, 2005, the Examiner finds the claimed invention to be patentably distinct from the prior art of record. The prior art does not teach all of the limitations of the independent claim in combination with the other elements presented.

The prior art of record teaches remote installations over a network that includes installing with executable code. The prior art also teaches the use of the Win32_Product class in facilitating these installations.

However, as per claims 1-22, the prior art fails to specifically teach the use of the Windows Management Instrumentation Win32_Process class in enabling these remote installations. The claimed language is viewed in light of the specification and the arguments presented by the applicant, which differentiate between the Win32_Process and Win32_Product class objects. The claims are therefore interpreted to refer to the

Win32_Process class located in Windows Management Instrumentation functionality, and not a more general interpretation of an execution process.

4. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
